148*210mm

Life Timer

Model: WTPRTIME

Installation Instructions

Functional Description:

The timer can indicate the usage status of the filter element through indicator lights and a buzzer, reminding you to replace the filter element in time to ensure drinking water health.

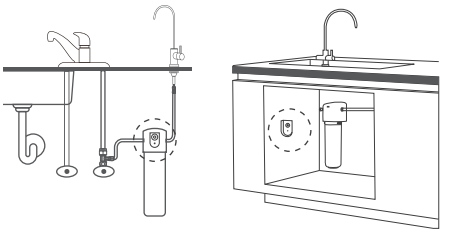

Product Installation:

The back cover of the timer is covered with double-sided tape.

And you can freely choose the fixing position. It is recommended to install it on a clean and flat surface. Before sticking, please wipe the sticking surface to prevent poor adhesion.

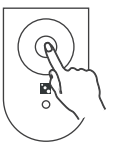

⚠ **NOTE:** The installation position of the timer should **avoid water splashing or dripping and avoid installation near direct sunlight or heat sources.**

take "quick connect undersink water filtration system" for example

Instructions:

Press and hold for 3 seconds to start timing.

Press once to check the filter status or disable the active reminder function.

1. When using for the first time or resetting, press and hold the button for 3 seconds. The indicator light will flash blue 3 times, and the buzzer will beep for 0.5 seconds to indicate successful startup or reset and begin timing;
2. Press the button 6 times to stop the timer and reminder;
3. The product has different reminder methods in different status. The active reminder function can be canceled by pressing the button once.
